LARVAL PLUS FEED

PRODUCT DESCRIPTION:

Larval Plus shrimp larval feed contains premium formula developed for P. Japonicus shrimp larval rearing. The feed contains high level of marine based protein, vitamins, micro nutrients and natural anti—oxidants. The delicate selection of nutrition successfully improves immunity of shrimp and increases pathogenic tolerance leading to better health, survival and growth rate.

Larval Plus is exclusively engineered to contain necessary nutrition aim to develop healthy reddish color of shrimp Larvae giving it a very unique pigmentation to benchmark the high

quality larvae. Summarized product

benefits are as follows:

- High quality and digestive marine based ingredients that can effectively convert into growth factor leading reduced production cycle and cost.
- Rich in Vitamin and micro nutrients to improve shrimp immunity and tolerance against pathogenic or condition fluctuation stress.
- Effectively replaces artemia while maintaining the physical larval appearance primarily fed with artemia.
- High in natural anti-oxidant to induce cell development, growth and survival.
- Dustless and very water stable to reduce nutritional leach and organic load in water.
- Very uniform particles and easier feed code selection by operators.
- Fasten molting recovery to reduce cannibalism and loss.

APPLICABLE SPECIES:

- Penaeid shrimp species. P. Japonicus, P. Monodon, L. Vannamei.

PRODUCT SPECIFICATION:

	FEED SIZE(micron)	CRUDE PROTEIN	CRUDE FAT	PACKAGE	LARVAL STAGE
Larval Plus 100	60-150	55%	8%	1kg *10	Mysis 2-PL6
Larval Plus 200	150-250	55%	8%	1kg *10	PL5-PL11
Larval Plus 300	250-400	55%	8%	1kg *10	PL11 and above

FOR AQUACULTURE USE ONLY NOT FOR HUMAN CONSUMPTION.
