E-LARVAL FEEDS

PRODUCT DESCRIPTION:

E-Larval shrimp larval feed is a balanced formula developed to satisfy dietary requirement in post larval rearing of healthy and stable PL production. E-Larval contains essential nutrition to meet the best cost and effectiveness balance for larval rearing. E-Larval composes dust free micro particulated particles and is very uniform in size. The stability minimizes nutrition leach and maintains water quality. Summary benefits are as follows:

- Premium quality marine based ingredients. Do not contain land animal, avian and mammal

proteins. Providing natural protein source for better digestion and improve growth, survival and FCR.

- Highly attractive to facilitate weaning process from live feeds.
- Highly digestive ingredients to best utilize nutrition and minimize protein loss.
- Very water stable to reduce organic load and toxic gases development.
- Narrow feed intervals for easier feeding management and reduce larval growth variation.
- Fast growth to reduce production cycle and cost.

APPLICABLE SPECIES:

Penaeid shrimp species. *P. Japonicus*, *P. Monodon*, *L. Vannamei*.

PRODUCT SPECIFICATION:

E-Larval 100	60-150	50%	8%	1kg*10	Mysis 2-PL6
E-Larval 200	150-250	50%	8%	1kg*10	PL5-PL11
E-Larval 300	250-400	50%	8%	1kg*10	PL11 and above

FOR AQUACULTURE USE ONLY NOT FOR HUMAN CONSUMPTION.
