INSTANT ALGAE – NANNO 3600

PRODUCT DESCRIPTION:

Nanno 3600 is our original high-yield rotifer feed. It is single species (Nannochloropsis) and produces phospholipid rich rotifers. It also provides a high Feed Conversion Rate with minimal organic waste in the tank, and gives an EPA and ARA pre-enrichment boost for use with high DHA enrichment protocols.

BENEFITS OF NANNO 3600:

- Optimum Enrichment — Supports HUFA enrichment.

- Healthy Rotifer Cultures — Rapid growth and reduced bacteria loads.
- High Yields — Rotifers can double daily at densities over 8,000 L-Type rotifers per ml.
- Concentrated, Clean, Liquid Form — Exceptionally clean and easy to use with minimal foaming or clumping, which means less time spent maintaining cultures.
- Long shelf life — can be kept frozen for two years.

FOR AQUACULTURE USE ONLY NOT FOR HUMAN CONSUMPTION.
